Bengaluru • +91 9902210583 • shakthivelk1124@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#) • [LeetCode](#)

PROFESSIONAL SUMMARY

Software Engineering student (CGPA 9.26/10) specializing in full-stack development and DevOps, with hands-on experience in React.js, Node.js, RESTful APIs, Docker, Jenkins, Kubernetes, and CI/CD pipelines. Proven ability to design, build, secure, and deploy scalable, production-ready web applications through 8+ full-stack projects and a completed Software Engineer internship, delivering 100% of sprint milestones. Skilled in developing responsive and accessible user interfaces, secure backend services, containerized applications, automated CI/CD workflows, and Git-based collaborative development. Seeking a Software Engineer / Full-Stack Developer role to apply strong CS fundamentals, full-stack expertise, and DevOps practices to build scalable, secure, and high-impact software in an agile, product-driven environment.

EDUCATION

B.E. Computer Science & Engineering 2023 – 2027 (Expected)

Global Academy of Technology, Bengaluru • CGPA: 9.26/10 (6 Semesters)

Pre-University — 12th Standard 2023

Swargarani PU College, Bengaluru • 78.6%

TECHNICAL SKILLS

Programming Languages: Java, C, Python, JavaScript

Core CS Fundamentals: Data Structures, Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Problem Solving

Frontend: React.js, React Hooks, HTML5, CSS3, Tailwind CSS, React Router, Axios, Responsive Web Design

Backend & APIs: Node.js, Express.js, REST APIs, JWT, bcrypt, Multer, Microservices Architecture

Databases: MongoDB, MongoDB Atlas (Mongoose), MySQL

DevOps & Cloud: Git, GitHub, Jenkins, Docker, Kubernetes, Azure, ACR, NGINX, SonarQube, Trivy, OWASP ZAP, Prometheus, Grafana

Tools: Postman, VS Code

AI/ML: Gemini AI API, XGBoost, Random Forest, Scikit-learn, Pandas, NumPy

PROFESSIONAL EXPERIENCE

Software Engineer Intern | Skillfied Mentor, Bengaluru Jan 2026 – Feb 2026

- Designed and delivered two full-stack production applications — a Secure Authentication System and a Blog Platform — within a 30-day sprint, achieving 100% feature completion across all delivery milestones.
- Architected RESTful APIs with secure session management (JWT + bcrypt hashing), role-based access control (RBAC), and protected middleware to safeguard user data and enforce authorization boundaries.
- Implemented CRUD operations, advanced search functionality, and author-level authorization; debugged edge cases and optimized MongoDB queries to improve application performance.

PROJECTS

Implementation of a Secure CI/CD Pipeline Using DevOps Tools | *Jenkins • Docker • Kubernetes • Azure • SonarQube • Trivy • OWASP ZAP*

- Designed and automated an end-to-end CI/CD pipeline on Jenkins, integrating source control, build, test, and deployment stages for a DevSecOps workflow.
- Integrated SonarQube for static code analysis and Trivy for container vulnerability scanning, enforcing quality gates before deployment.
- Containerized the application with Docker and orchestrated deployment on Kubernetes, provisioning Azure Container Registry (ACR) for image storage.
- Implemented OWASP ZAP for automated DAST scanning; configured Prometheus and Grafana for real-time monitoring of application and infrastructure metrics.

AI Virtual Assistant (Voice-Enabled) | *MERN Stack • Gemini AI • JWT • Cloudinary*

- Architected an end-to-end voice-enabled assistant using Gemini AI NLP with sub-2-second response latency; implemented secure session management (JWT + bcrypt) and integrated Cloudinary for scalable media handling.

MovieGo — Scalable Ticket Booking Platform | *React.js • Node.js • MongoDB • Inngest*

- Developed a scalable full-stack booking platform with dynamic seat selection, watchlist management, and multi-step booking workflows; engineered asynchronous job queues with Inngest to decouple notification pipelines.

AquaLens AI — Geospatial Risk Prediction Platform | *React.js • Python • FastAPI • XGBoost*

- Built a full-stack ML platform predicting groundwater depletion risk across 198 BBMP wards using 3 years of satellite data; engineered a preprocessing pipeline and model-serving REST API.
- Trained and tuned XGBoost and Random Forest models through feature engineering; ranked in the Top 60 of 115 teams at the Code Rush 24-Hour Hackathon (AI for Sustainability track).

DropZone — Secure Cloud Storage System | *React.js • Node.js • MongoDB • Cloudinary*

- Designed a secure cloud storage application with role-based access control, drag-and-drop uploads, and storage analytics dashboards; implemented CRUD operations with granular authorization checks, integrated Clerk authentication, and deployed on Vercel.

ACHIEVEMENTS & HACKATHONS

- Code Rush 2026 (CMR Institute of Technology): Shortlisted in Top 60 of 115 teams nationwide for the AquaLens AI geospatial platform, built in 24 hours.
- Hack-A-League 4.0 — National Hackathon (GAT, Feb 2026): Developed a full-stack application using the Gemini API and MERN stack among top college teams.
- Internal Smart India Hackathon (SIH) 2025: Selected to represent GAT at the national round.
- Academic Excellence: 9.26/10 CGPA with 7 industry certifications and 8+ full-stack projects.

CERTIFICATIONS & PROFILES

MERN Stack Developer • Applied Generative AI • Python Developer • Data Visualization (Tableau) • Front End Web Developer • Java Foundation • Git Foundation — Infosys Springboard (2024–2026)
